Dear Greg,

I've read your paper on the current status of the R. Kennedy assassination evidence and think it is good, save that as I've suggested, a different approach might be better adapted to reaching certain kinds of people.

Under Available Avenues of Inquiry if you have need to revise this draft I suggest you include FOIA vs FBI, FBIHQ and LA.

For those who do not know, if you revise, I'd include first names.

In I. where you tick off shots, you repeat that each of the possibles would be a ninth shot. I think it would be better to say still another shot as you go through the list instead of repeating nine each time, which can disturb concentration and cause wonder. x

Your name and address also might be included, if you want anyone reading it to get in touch with you.

Hope all goes well with you and your project. Thanks and

best wishes,
